

## EXPERTLY REBUILT RS134/530 TRIM LINE

### RS 134/530 for Three or Four edge Trimming

- The RS134/530 four knife trimmer is compatible with press speeds up to 80,000 copies per hour.
- Trims products with page counts of 4-96 pages and shingled streams up to .5" or 13mm thick.
- Consists of two rotary trimmers and two bump turns (four separate modules).
- Tungsten carbide knife provides extraordinary durability.

**Segmented Knife Technology**

*Segmented knife technology allows the knife diameter and cutting angles to remain unchanged providing consistently high trim quality for the life of the trimmer.*

- Segmented knife technology provides several additional advantages including:
  1. Extremely long knife life.
  2. Low operating costs due to long knife life.
  3. Reduced paper waste.
  4. Minimized set-up times.
- Knife regrinding is not needed until several million trims have been achieved.
- Knife segments can be extended as many as thirty times before replacement segments are needed.

**GammTech Rebuilding Process**

- Each machine is stripped to the frame and painstakingly examined for wear.
- Worn parts are replaced.
- Electrical components are checked.
- New belts and bearings are installed.
- A new paint finish is applied, bringing the equipment to "like-new" condition.

**GammTech Parts Warranty**

- Each rebuilt GammTech machine comes complete with a one-year parts warranty.

Speed <sup>1)</sup>	80 m/min (263 ft/min)		
Pagination <sup>2)</sup>	4 – 96		
Formats untrimmed	A x B	min.	122 x 122 mm (4.8" x 4.8")
		max.	530 x 530 mm (20.9" x 20.9")
Formats trimmed	A x B	min.	118 x 118 mm (4.65" x 4.65")
Trim width <sup>2) 3)</sup>	2 – 65 mm (.08" – 2.56")		
Shingle thickness		max.	13 mm (.50")
