

EXPERTLY REBUILT RS114/530 TRIMMER

RS 114/530 for two edge Trimming

- The RS114/530 two knife trimmer is compatible with press speeds up to 80,000 copies per hour.
- Trims products with page counts of 4-64 pages and shingled streams up to 5/16" or 8 mm thick.
- Each unit contains of two rotary segmented knives
- Tungsten carbide knife provides extraordinary durability.

Segmented Knife Technology

Segmented knife technology allows the knife diameter and cutting angles to remain unchanged providing consistently high trim quality for the life of the trimmer.

- Segmented knife technology provides several additional advantages including:
 1. Extremely long knife life.
 2. Low operating costs due to long knife life.
 3. Reduced paper waste.
 4. Minimized set-up times.
- Knife regrinding is not needed until several million trims have been achieved.
- Knife segments can be extended as many as thirty times before replacement segments are needed.

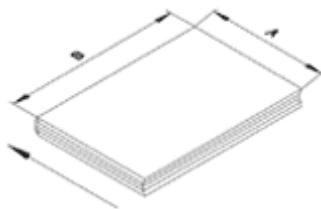

GammTech Rebuilding Process

- Each machine is stripped to the frame and painstakingly examined for wear.
- Worn parts are replaced.
- Electrical components are checked.
- New belts and bearings are installed.
- A new paint finish is applied, bringing the equipment to "like-new" condition.

GammTech Parts Warranty

- Each rebuilt GammTech machine comes complete with a one-year parts warranty.

Speed ¹⁾	80 m/min (263 ft/min)		
Pagination ²⁾	4 – 64		
Formats untrimmed	A x B	min.	122 x 122 mm (4.8" x 4.8")
		max.	530 x 530 mm (20.9" x 20.9")
Formats trimmed	A x B	min.	118 x 118 mm (4.65" x 4.65")
Trim width ^{2) 3)}	2 – 50 mm (.08" – 1.96")		
Shingle thickness		max.	8 mm (5/16")

1) optional 100 m/min (328 ft/min)

2) depending on paperweight

3) depending on pagination
